

# Honeycomb

## LIDAR

### Quick Start Guide

---

At Waymo, we don't just develop lidars; we use them every day in our self-driving vehicles to navigate some of the most challenging environments and situations in the world. Now, after two million hours of testing in real-world conditions, we're sharing our best-in-class sensor with you. We hope you're as excited as we are to use this unique and powerful lidar.
